Education

CSUN — B.S. Computer Science | May 2026 | GPA 3.35

Projects

Experimentum — Unity / C# / Project Lead & Core Developer

- Led a 5-person team in developing an interactive educational game featuring 12 virtual science experiments.
- Developed core gameplay systems and scripting, including implementation of 4 experiments.
- Designed and implemented UI systems and interaction logic for guided, task-based experiments.
- Coordinated development using GitHub and Jira.

Algorithm Visualization Tool — JavaScript / HTML / CSS

- Collaborated on a 4-person team to develop an interactive algorithm visualization tool for Binary Search and Merge Sort.
- Developed step-by-step visualizations and time-complexity explanations to demonstrate algorithm behavior and performance.

CSUN Location Challenge — JavaScript / Google Maps API

- Developed an interactive location-based game using JavaScript and the Google Maps API.
- Implemented gameplay logic that evaluates user guesses based on proximity to CSUN buildings and awards points accordingly.
- Integrated Google Maps functionality into a custom interactive web application.

Giga Pet — JavaScript / HTML / CSS

- Developed an interactive virtual pet application using JavaScript and HTML.
- Implemented JavaScript-driven interactions and dynamic changes to the webpage based on user actions.

Technical Skills

Languages: Java, Python, JavaScript, C#, HTML, CSS, SQL

Tools: Unity, GitHub, Jira, MySQL, VS Code

Relevant Coursework: Machine Learning, Database Design

Experience

EOP — Open House Volunteer | 2022

- Collaborated with staff and team members to support event operations and communicate with prospective students and families about EOP programs.

Educare Foundation — Event Volunteer | 2021–2022

- Supported event setup, logistics, and public outreach while working with staff to ensure events ran smoothly.
